OVERVIEW

A Plus is an *Academic Management Information System* (MIS) with a difference and having a feature-set that is second to none. It prides itself with proven functionality that streamlines the whole operation of an academic institution with the end result being full transparency and overall efficiency.

A Plus is especially designed to offer more visibility and analysis into the academic performance, progression and statistics that are the primary metrics for both Pre-primary, Primary, Secondary and Tertiary schools.

Supporting functions are also integrated into the system; these include library, boarding, administration, finance, and parent/guardian communication medium.

This system fully allows customization and extensions to suit the unique needs of each academic institution.

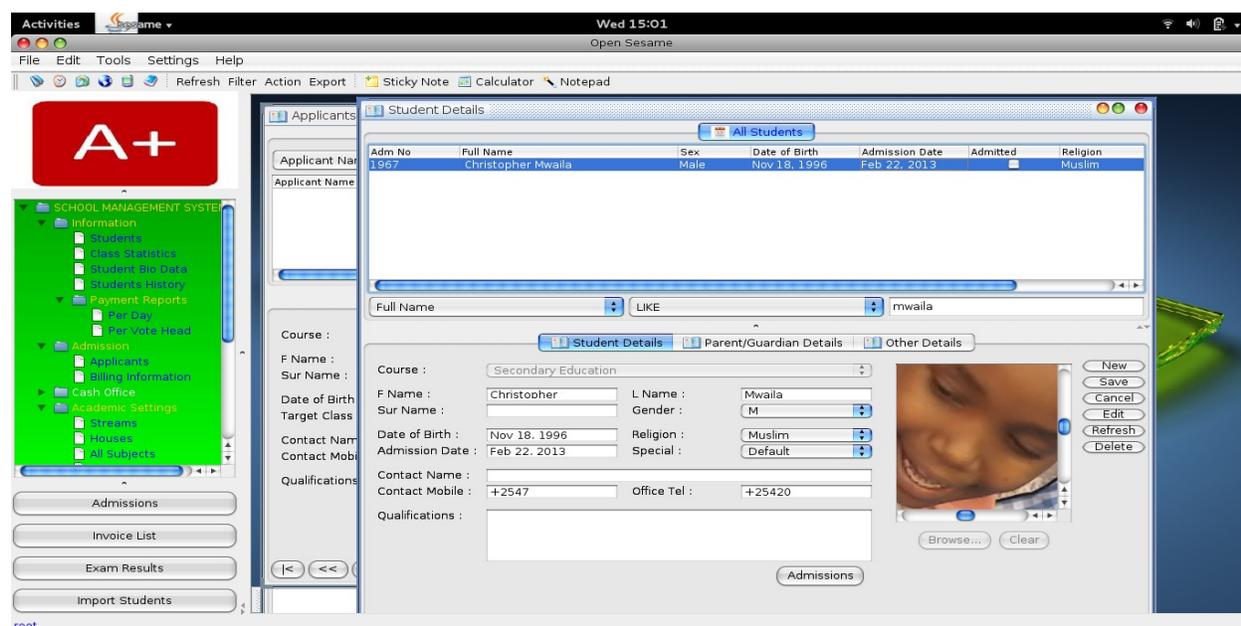

A Plus shall integrate and automate the following processes (among others) in your academic institution:

- ✓ Student Admissions and Clearance
- ✓ Examinations
- ✓ Library and Boarding
- ✓ Disciplinary cases and extra-curricular activities
- ✓ Procurement and Accounts
- ✓ Reporting and Analysis
- ✓ Plus any additional processes requested by the client

Other possible integrations/extensions include

1. A **self-service** portal where students or parents/guardians shall use to log in to check result-slips and receipts among others.
2. **SMS** interface for results, announcements and queries
3. **Document/Records Management System** to reduce the inefficiencies of physical filing facilities

OVERALL OBJECTIVES

The following is a summary of the overall objectives of this Academic Management System

- 1 To manage and track each student's progress from admission up to school completion and clearance.
- 2 To enable quantitative analysis of academic performance using searchable and informative reports, charts and graphs.
- 3 To provide a software system that integrates library, boarding, finance, academics and procurement functions in an academic institution.
- 4 To provide a communication tool that will enable the institution to send notifications to parents/guardians via SMS and also allow them to query the exam results of their children via SMS.
- 5 To provide a shareable and searchable central database to simplify digital storage of information
- 6 To provide a solution that is adaptable, scalable and evolving according to the changes in the institutions policies and the general operating environment.
- 7 To speed up the processes and cut the costs associated with shortcomings of a non-integrated system and any loss of goodwill resulting from them.

TECHNICAL SUMMARY

- ✓ Available in both desktop or web-based versions
- ✓ Accessible by all devices and all operating systems
- ✓ Client Server and Multi-user with concurrent access
- ✓ SMS interface (available on request)
- ✓ Supports student and staff photos in all image formats
- ✓ Simple and Intuitive User Interface
- ✓ Excellent reports and charts
- ✓ Data is readily exportable to Excel, PDF, Word and CSV
- ✓ Highly scalable and easy to extend and customize
