## OVERVIEW

**TEAMS** is a complete and solid *Project and Asset Management System*. **TEAMS** will help you know, organize and update information about your projects, real estate, movable and immovable assets in addition to managing their lifecycle in order to provide insight and support decision making.

**TEAMS** is a web based solution that integrates a *workflow* engine, a *mapping* system, a *document management* system, Email & SMS notifications, reporting/analytics module and a 3D Building Information Model (BIM) viewer.

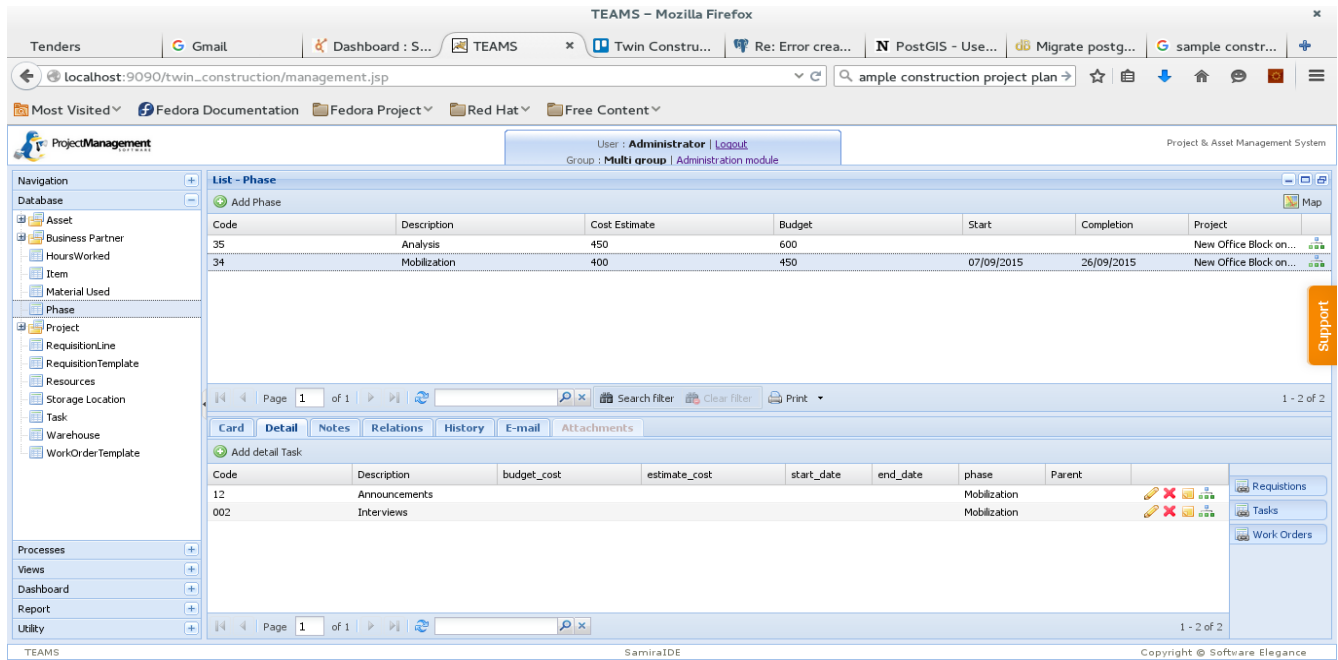

What else ? **TEAMS** is configurable and customize-able making it easy to adapt to the client's ever-changing operational environment, which usually includes procedures, documents, roles and responsibilities, reporting standards, georeferences and external systems.

Its easy to see why **TEAMS** is the first choice for:

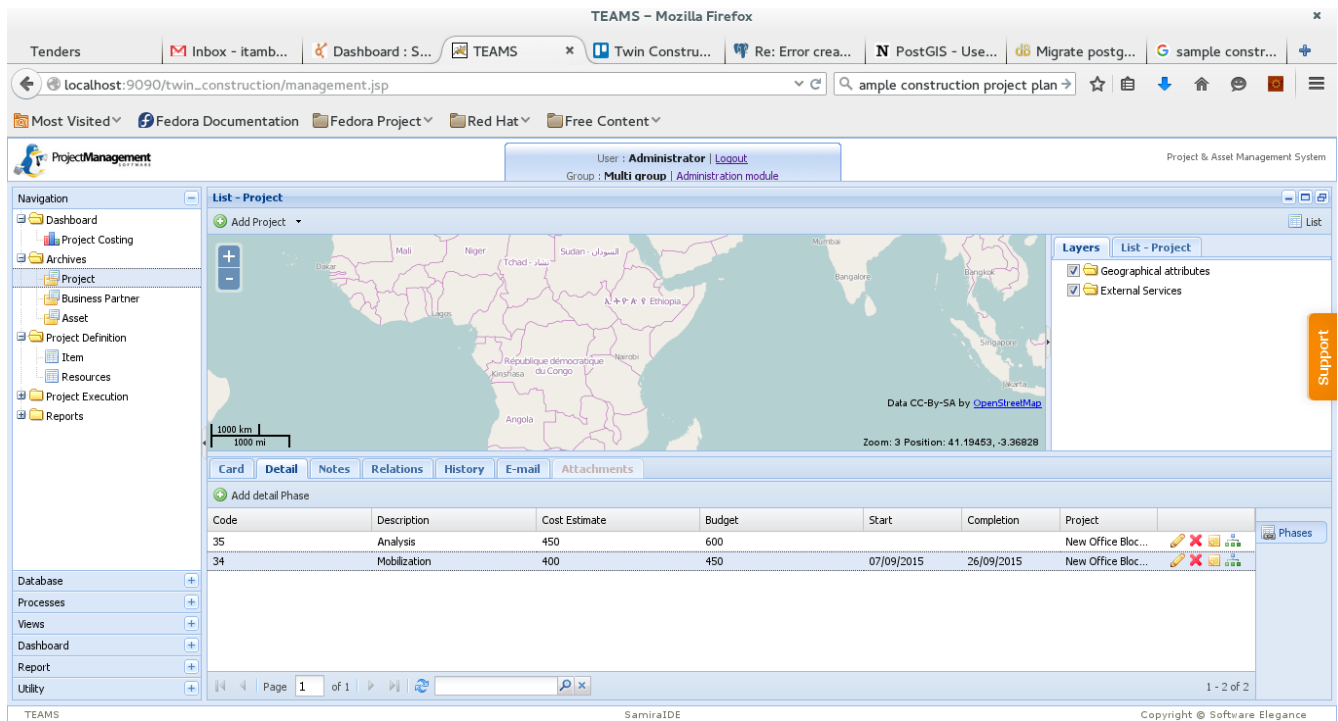

- ✓ Property Management (agents, individuals and private companies)
- ✓ Architecture, Engineering & Construction projects
- ✓ Space & Asset Inventory management
- ✓ General Project Management

# A. USER INTERFACE

Simple yet powerful

GIS integration (Google Maps, Yahoo Maps, GeoServer and Open Street Map)

# Dashboards

The screenshot shows the TEAMS Project Management Dashboard. The user is logged in as Administrator. The dashboard is titled "Dashboard - Project Costing" and contains two main charts:

- Actual Cost vs Estimated Cost:** A bar chart showing the amount for different phases. The Y-axis is labeled "Amount" and ranges from 0 to 10000. The X-axis is labeled "Phase" and includes "Analysis" and "Mobilization". The legend indicates "PhaseEstimate" (green) and "ActualResourceCost" (blue). For the "Analysis" phase, the ActualResourceCost is approximately 9000, while the PhaseEstimate is around 1000. For the "Mobilization" phase, the ActualResourceCost is around 1000, and the PhaseEstimate is around 500.
- Overall Project Estimates:** A pie chart showing the distribution of costs between "Analysis" (green) and "Mobilization" (blue). The "Analysis" segment represents approximately 70% of the total, and the "Mobilization" segment represents approximately 30%.

The interface includes a navigation menu on the left, a top navigation bar with user information, and a footer with "TEAMS SamiraIDE Copyright © Software Elegance".

# Data input and workflows

The screenshot shows the TEAMS Project Management interface for the "WorkOrderProcess" workflow. The user is logged in as Administrator. The interface displays a list of activities and a detailed view of a specific activity.

**List - WorkOrderProcess:**

Activity Name	Description	Request Date	Phase	Approved
Update Materials Used, ...	Testing linkCards widget			No
USER: Update Man Hours				
USER: Update Materials Used				

**Activity Details:**

- Activity Name: Update Materials Used, ...
- Description: Testing linkCards widget
- Type:
- Request Date:
- Phase:

The interface includes a navigation menu on the left, a top navigation bar with user information, and a footer with "TEAMS SamiraIDE Copyright © Software Elegance".

## Ready to run reports

The screenshot shows the TEAMS web application interface. The main content area displays a report titled "List of Projects" with a table of project data. The table has columns for Code, Project, Client, Start, Estimate, and Manager. The data rows are:

Code	Project	Client	Start	Estimate	Manager
001	New Office Block on LR 123		9/6/15 5:17	100000.0	
002	Southern By Pass		9/8/15 8:37		
589	Rehabilitation of Makueni district		9/15/15 6:17		

The interface includes a navigation sidebar on the left, a top navigation bar with user information (Administrator), and a "Support" button on the right side of the report area.

Help is only a click away via the 'Support' button on the right.  
(attach file, automatic screenshot, online knowledge base)

The screenshot shows the TEAMS web application with the "Help & Support" modal open. The modal contains a form for user identification and a search interface. The user information section includes:

- Email: mike@gmail.com
- Name: Mike
- Search term: Server

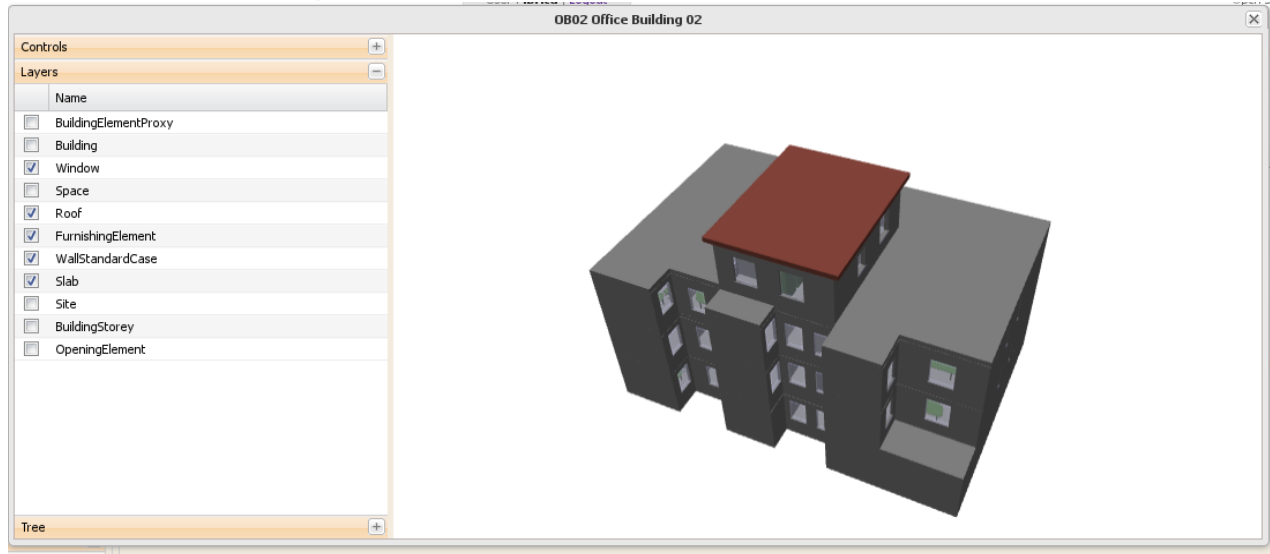

The search results section displays:

**Search results**

- [Server Administration](#)
- CENTOS **SERVER** POSTGRES a. restarting service postgresql-9.0 restart b. stopping service postgresql-9.0 stop c. starting service
- [Server Configurations](#)

The modal also includes a text area for the user's question, an "Attach a file" button, and a "Submit" button. The background shows the "List of Projects" report from the previous screenshot.

### 3D BIM viewer with layer selection

## B. BENEFITS

1. Configurable and customizable to client's needs.
2. Web based interface makes it accessible without configuration on the end-user's PC or Tablet.
3. All information regarding an asset is accessible from one screen (emails, documents, photos, notes, change history, relation to other assets/people, geographic location, among others).
4. Project's stages, tasks, resources and their relationships are always configurable, updatable and unlimited.
5. Robust work order management feature.
6. Project inventory management and usage reporting.
7. Procurement and requisition management.
8. Assignment and tracking of dependencies among project activities.
9. Compare budget, estimates and actual costs.
10. Automatically start a workflow process in response to an email.

## C. ADVANTAGES

1. TEAMS imposes no limits on the number of users, computers or data captured.
2. Flexible warranty period starting from 6 months up to 1 year.
3. Industry standard workflow specification (XPDL)
4. This system is not a one-size-fits all. It is modified to fit the client's requirements during implementation.
5. Integrated Help facility with real-time access to our online knowledge base.
6. Immediate system updates and short release cycle.
